PROJECTS

Institute Management System | PERN Stack Live Preview

• Built a role-based platform to automate institute operations such as courses, enrolments, exams, and results, reducing manual work by 70%.
• Developed 15+ REST APIs with JWT authentication and email OTP verification, supporting 100+ concurrent users.
• Implemented real-time dashboards, leaderboard, and full CRUD workflows, and deployed the system on Render with production-ready configuration (99% uptime).

AI-Powered Resume Builder | MERN Stack Live Preview

• Built an AI-powered resume builder with authentication, OTP verification, and ATS analysis, enabling users to create and preview resumes using 4 customizable templates with real-time editing.
• Integrated Gemini AI API to automatically analyse resumes and generate ATS scores and improvement suggestions, helping users optimize resumes for better job screening results.
• Developed a secure backend using Node.js, Express, and MongoDB with JWT authentication, supporting AI analysis, resume management, and file uploads up to 50MB.
